ALLOWABLE SUBJECT MATTER

1. Claims 14-15 and 44-45 (renumbered as claims 1-4) are allowable over the prior art of record.

2. The following is an examiner's statements of reason for allowance:

The examiner has found that the prior art of record does not appear to teach or suggest or render obvious the claimed limitations in combination with the specific added limitations as recited in independent claims and subsequent dependent claims. The prior art of record fails to teach or suggest a method and a computer storage media having computer-executable instructions stored thereon for controlling the status of network address space by changing a status of a portion of network address space from free to another status comprising detecting within a definitional listing for the network address space, a block with free status of sufficient size to cover the block size to allocate for a current network, then assigning the new status to the detected block within the definitional listing for the current network, and lending a block from a second network that aggregates with the current network when a block of the requested size does not exist within the network address space assigned to the current network, and otherwise returning a fail indication and not lending a block from a second network that aggregates with the current network when a block of the requested size does not exist within the specified range but does exist within the current network, and then detecting whether a block of at least the requested size exists within a specified range of the

network address space assigned to the second network when a block of at least the requested size exists within a specified range of the network address space assigned to the second network, splitting the block until it is the requested size and moving a resulting block from the second network to the current network as represented within the definitional listing and when a block of the requested size does not exist within the specified range, and lending a block from a third network that aggregates with the second network.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Philip B. Tran whose telephone number is (571) 272-3991. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

5. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
